Design, Installation and Service

Northshore Utility District Headquarters CCTV System Upgrade

Reliable Security Sound & Data would like to announce that they have been awarded the Northshore Utility District Headquarters CCTV system upgrade project. Reliable will be responsible for installing IndigoVision HD IP cameras along with updated cabling.

February 1, 2010

Northshore Utility District
Headquarters

All cameras will be IP with over 90% of them being HDTV 720p. The entire security infrastructure will be updated with CAT 6 cabling. This upgrade will allow for better overall security for the operations and will interconnect on a secured local area network (SLAN) with the utility's remote water storage sites.

Reliable Security Sound & Data is pleased to be working once again for the Northshore Utility District, and look forward to completing this project on time and on budget.

Northshore Utility District

The IndigoVision 10000 HD IP cameras have HD megapixel resolution (1280 x 720 Progressive scan). The cameras use a 1/3" Progressive scan sensor, guaranteeing excellent performance.

These cameras enable simple deployment of IP based video systems as they only require a single CAT 5 cable for connection to the network. The built-in Power-over-Ethernet support allows the camera to be powered directly from the network, reducing installation costs.

About Reliable Security Sound & Data- Reliable Security is a full service low voltage electrical contractor based in Everett, Washington. Reliable Security offers design build services, design only and specification bidding. Reliable Security has over 29 years of experience in the design and installation of large central based information systems that comprise surveillance, security, life safety, audio/visual, voice/data and slot data systems. Reliable Security works throughout North and South America.
